

ME GLOBAL
SUPPLIES

Nutraceutical Production Solutions

About Our Company

ME & Global Supply Ltd is a specialized engineering company delivering tailor-made machinery and complete production lines for regulated industries. We focus on nutraceutical, pharmaceutical and biotechnology manufacturing environments where precision, reliability and compliance are critical. From concept to commissioning, we provide end-to-end engineering support including design, fabrication, installation and after-sales service.

Our Services

Custom Nutraceutical Manufacturing Systems

Scalable, hygienic and GMP-aligned production solutions for modern supplement manufacturers.

Solutions:

Powder Processing Systems

Capsule & Tablet Manufacturing

Liquid Supplement Production

Our Projects

- **Manufacturing Line Upgrade & Automation Enhancement**

Upgrade and automation enhancement of an existing manufacturing line to improve efficiency, reliability and data traceability.

Industry: Pharmaceutical Manufacturing

ME GLOBAL
SUPPLIES

- Custom Process Equipment for Biotech Manufacturing

Engineering and fabrication of specialized process equipment for a biotech production facility requiring high precision and contamination control.

Industry: Biotechnology & Life Sciences

- Integrated Packaging Automation Solution

Custom engineering of an automated secondary packaging system designed to streamline packaging operations and improve throughput.

Industry: Pharmaceutical & Health Products

- Clean Utility Water System for Pharma Facility

Design and implementation of a clean utility water system to support pharmaceutical manufacturing processes, ensuring consistent water quality and system reliability.

Industry: Pharmaceutical Manufacturing

- Automated Filling & Capping Line Integration

Engineering and integration of an automated filling and capping line designed to improve production speed, accuracy and batch traceability.

Industry: Health & Nutraceutical Products

- Custom GMP Liquid Processing System

Design and delivery of a custom-built liquid processing system for pharmaceutical formulations, engineered to ensure product consistency, hygiene and regulatory compliance.

Industry: Pharmaceutical Manufacturing
